- Git

Languages

- English
- Russian
- Belarusian

Education

BSUIR / Higher education /

Sep 2011 – Jun 2016 / Minsk

Degree Name: Bachelor (5 years). Information Technology Engineer.

Software Engineer - Android

Accomplishments

- Worked on two android projects with over 10 million users.
- Decreased releasing required time of android app by 2 months. Thanks to the reliable architecture that I designed from scratch, our Android team has managed to finish the project within 3 months only, while our IOS team managed to finish it within 5 months.
- Increased product's income. I recommended releasing a new UX for android app with 10 million users. This improvement attracted over 50,000 new users and increased rank in Google Play.
- Saved about 30 percent of the team's time. I detected problem in big android team and helped to implement the SCRUM methodology. Thanks to such good business processes, we completed the scope of tasks in 4 months, which was initially estimated to be 6 months.
- Participated in more than 10 commercial projects.
- 5,5 years experience in native android development.

Work Experience

Self-employed / Software Engineer / Jan 2020 – Present / Remotely

I was self-employed and worked remotely. I greatly improved my technical and organizational skills here. The remote work has helped me to improve my time management skills. I established good networking, mentored developers, well-estimated tasks and code reviews.

Projects:

- Shelfy / Israel / (Retail apps with about 10M users)
- Potto Sales / Belarus / (International discount aggregator)
- Jaguar InControl Remote / Land Rover InControl Remote / UK / (Remote car control)

ScienceSoft / Software Engineer / Jun 2018 - Sep 2019 / Minsk, Abu Dhabi

It is an outsourcing company. I was working on Agile in large teams and was establishing effective teamwork. My technical and soft skills have improved tremendously in this company. In addition, I have made public speeches in this company about new technologies.

Projects:

- Project is protected by a Non-Disclosure Agreement (NDA) / UAE / (Security)
- LatticePro / USA / (Medical industry)
- Lixar / Canada / (Medical industry)
- SINAM / Belarus / (Banking)

VironIT / Software Engineer / Jun 2017 – Jun 2018 / Minsk

I worked in an outsourcing company in large Agile teams. I acquired excellent skills in working in international teams and mentoring other developers in this company. In addition, I did estimations to large projects for various customers.

Projects:

- Yota / Russia / (Mobile operator app with about 10M users)
- Pluggd / Canada / (Business industry)
- WorkshopChat / USA / (Business industry)

Golden Software / Software Engineer / Oct 2015 – Jun 2017 / Minsk

I worked with android apps in product company that develops ERP systems. My team and I completed 3 high quality and reliable apps. In addition, I acquired excellent communication skills.

Freelance / Software Engineer / Jun 2015 – Oct 2015 / Minsk

I began to gain experience in developing android apps and solving problems for my customers. I completed 4 small projects from scratch and got great feedback from clients.
